

Test Report

Crop : Hami Melon / Cantaloupe

Bio Plant Stem Cell

Feedback from Farmer

“昨天安排哈密瓜实验用的长势最差的一垄做的,我让用受灾区域的哈密瓜植株做的对比实验,目前效果不错”

Yesterday I arranged for the cantaloupe experiment to be made from the worst growing ridge, and I asked the comparison experiment with cantaloupe plants in the affected area, and the results are good

“有使用 跟没使用FARMCELL，
生长速度明显差别很多。”

There is a significant difference in
growth rate between those that
used FARMCELL and those that
did not.
